Our teachers are very excited about the resources available through PBS LearningMedia. The math/science teachers participating in our ESA project attended a 3-hour training and returned to their classrooms with enthusiasm and direction. Many are reporting PBS implementation in their lessons on a regular basis. They also returned to respective schools to spread the word to their peers; reaching far beyond math and science. PBS LearningMedia is an incredible instructional resource!!!!

Graham/Greenlee ESA
Staff Development Coordinator

As America’s largest classroom, PBS is the number-one source of educational media for students and teachers, at home and in schools, from coast to coast. PBS LearningMedia is the newest educational resource from the nation’s most trusted educational media brand.

WHAT IF LIMITED BUDGETS DIDN’T LIMIT LEARNING?

Introducing PBS LearningMedia, a vast new digital content service from the most trusted educational media brand: PBS.

az.pbslearningmedia.org
INTRODUCING PBS LEARNINGMEDIA

PBS LearningMedia is a new on-demand media service for educators that provides easy access to classroom-ready, curriculum-targeted, multi-platform resources. Made available through partnerships with local public television stations, PBS LearningMedia is built to support the needs of today’s classroom.

PBS LearningMedia aggregates the highest quality educational content from public media producers, delivering a next-generation digital media platform for PreK-12 classrooms. With thousands of curriculum and professional development resources from leading educational producers, PBS LearningMedia provides customized solutions to support classroom needs.

PBS LearningMedia delivers research-based, rich media experiences that engage students in exploring curriculum concepts. The content is designed and aligned to the needs of today’s teachers and learners.

PBS LEARNINGMEDIA OFFERS:

• An integrated service providing unique access to best-in-class resources from public media producers and partners
• A robust content library with thousands of digital resources designed and aligned to common core and national standards.
• An innovative delivery platform that is uniquely customizable
• A cost-effective solution for evolving digital media classroom needs
• An online professional development resource for schools and educators

PBS LEARNINGMEDIA SERVICE OPTIONS

PBS LearningMedia is a flexible solution for digital content requirements in 21st Century classrooms. With three service options designed to support all levels of engagement, select the version that best meets your needs:

PBS LEARNINGMEDIA - BASIC

In partnership with local PBS Member Stations, the basic service is delivered at no cost to educators and includes thousands of high-quality, curriculum-based, digital resources – videos, interactives, audios, images and documents – that align with national and common core standards and allow educators to search, save, and share content.

PBS LEARNINGMEDIA - CUSTOM

A custom service option is available for states and districts looking for enhanced features to manage their local digital media needs. Features include:
• State standards alignment
• Local content upload and management with seamless integration into search
• Teacher-managed student access
• School, teacher and student account management tools
• Reports and analytics dashboard
• Access to additional content

The beauty of the PBS LearningMedia portal includes the ability for teachers to create and customize a high quality video resource library that can be shared with students for use at school or at home... This broadens the reach of the teacher and expands the traditional walls of the class.

PBS LEARNINGMEDIA - API

The API integration service provides a flexible option for organizations interested in embedding content and/or features seamlessly into an existing digital service or portal. Our technical team works with you to align and deliver the content to fit your local needs.
